

MEDICAL MIRACLE JOURNEY REPORT

“GIOT LANH BIRTHDAY – NURTURING GREEN LIVES”

THE GIOT LÀNH BRAND DONATED TO THE CHILDREN OF VIETNAM CHARITABLE FUND

VND **1.25** BILLION

SUPPORTING MEDICAL TREATMENTS **8** CHILDREN

Nguyễn Thành Trung
Hà Nội

- Apert Syndrome: fused fingers and toes, underdeveloped phalanges.
- Underwent 4 surgeries since 2019.
- **With Giọt Lành's support, had left-hand surgery on May 17, 2025.**

Treatment Cost
70,722,082 vnd

Trần Diễm My
Đắk Lắk

- Aftereffects of burn scars. The fingers are deformed and contracted. The elbows and knees are stiff, and the big toes curl inward.
- The child has undergone three surgeries since 2020.
- **With support from Giọt Lành, Diễm My underwent knee surgery in May 2025 to improve mobility and ease of flexion and extension.**

Treatment Cost
44,716,298 vnd

Tạ Minh Kiên
Tp Hồ Chí Minh

- Congenital Apert syndrome – a rare condition that causes cleft palate, fused fingers, and deformities of the skull and facial bones.
- Minh Kiên has undergone several surgeries since 2022, including cranial reconstruction, palate repair, and finger separation.
- **With support from Giọt Lành, little Minh Kiên underwent surgery in May 2025 to separate the middle and ring fingers of his right hand.**

Treatment Cost
69,082,833 vnd

Lê Duy Quang
Hà Tĩnh

- Radial bone deficiency and hypoplasia of the thumbs in both hands.
- **With support from Giọt Lành, the child underwent the first surgery in May 2025 – involving ulna osteotomy and the placement of an external fixation frame to lengthen the forearm bones.**

Treatment Cost
253,313,410 vnd

Siu Nữ
Gia Lai

- Retinoblastoma (right eye enucleated).
- At not yet two years old, little Siu Nữ – a Ba Na ethnic minority girl – had to undergo removal of her right eye due to retinoblastoma (eye cancer). The tumor continued to threaten her left eye, putting her at risk of losing her precious remaining vision.
- **With support from Giọt Lành, Siu Nữ received three sessions of intra-arterial chemotherapy. Currently, the tumor has calcified, allowing her to preserve her left eye, and she continues regular follow-up visits at the Eye Hospital.**

Treatment Cost
240,616,013 vnd

Lê Tuệ Anh
Vĩnh Long

- Bilateral retinoblastoma (both eyes preserved).
- Before turning two, Tuệ Anh was diagnosed with a severe case of retinoblastoma affecting both eyes, discovered when she was only seven months old.
- She received four sessions of intra-arterial chemotherapy starting from December 2024.
- **With support from Giọt Lành, Tuệ Anh underwent two additional intra-arterial chemotherapy sessions. Currently, the tumors in both eyes have calcified and stabilized. She continues follow-up monitoring and may receive supplementary treatments if necessary. The child has successfully preserved both of her eyes.**

Treatment Cost
193,364,134 vnd

Trịnh Khả Như
Cần Thơ (formerly Hậu Giang)

- Retinoblastoma (right eye enucleated).
- Khả Như was diagnosed with the disease at eight months old, and her right eye had to be removed. The malignant condition continued to affect her remaining eye.
- **With support from Giọt Lành, Khả Như received three sessions of intra-arterial chemotherapy.**

Treatment Cost
252,283,072 vnd

Lê Hà Nam
Cần Thơ (formerly Sóc Trăng)

- Vascular malformation in the left arm and back.
- Hà Nam is a lively and cheerful boy, but the congenital vascular malformation in his arm and back has significantly affected his daily life.
- When the Fund first received his case, the severe malformation prevented him from attending school like other children his age.
- **With support from Giọt Lành, Hà Nam underwent four additional sclerotherapy sessions. His health has gradually stabilized, and he is now able to attend school and start Grade 1.**

Treatment Cost
125,883,520 vnd
