

# TREATMENT REPORT

## FOR CHILDREN WITH CONGENITAL DISABILITIES AND ACCIDENTS

### IN FLOOD-AFFECTED AREAS BY TYPHOON YAGI AND OTHER DISASTER-STRICKEN AREAS IN 2025

SUPPORTED BY THE STAFF AND DOCTORS OF FV HOSPITAL

**700** MILLION VND TREATMENT SUPPORT FOR **5** CHILDREN

**Đặng Ngọc Hoàng**  
Lào Cai

- Ptosis (drooping eyelid) caused by muscular atrophy.
- Hoàng had the first medical examination at FV Hospital in April 2025 and a follow-up in June 2025.
- With the current condition of muscular atrophy, surgery is not required at this stage; instead, continuous monitoring and medical treatment are recommended.
- Since the patient lives too far away, the family will take Hoàng to the Vietnam National Eye Hospital in Hanoi for further examinations.

**Treatment Costs** 31,230,659 vnd

**Lê Duy Quang**  
Hà Tĩnh

- Radial deficiency and hypoplasia of the thumbs – both hands.
- Duy Quang underwent the first surgery on the right hand in May 2025.
- Further surgeries on the right hand are planned as follows:  
November 2025: bone graft surgery  
May 2026: thumb reconstruction surgery
- *The estimated treatment costs are for the two upcoming surgeries scheduled in November 2025 and May 2026.*

**Treatment Costs** 231,329,745 vnd

**Nguyễn Thị Trang**  
Quảng Bình

- Clubfoot.
- Trang underwent surgeries on both legs: the left leg in 2022 and the right leg in August 2024.
- Currently, Trang is able to walk with crutches and is gradually recovering. She needs regular follow-up appointments and physical therapy as scheduled by the doctor.
- *The treatment costs cover the total expenses paid from August 2024 to July 2025.*

**Treatment Costs** 188,830,654 vnd

**Nguyễn An Nhiên**  
Quảng Trị

- Lymphatic malformation in the neck.
- An Nhiên has undergone four sclerotherapy sessions since June 2024.
- Currently, the tumor in the cheek and neck has reduced by about 70%, and treatment is temporarily paused for monitoring. She will have regular follow-up check-ups as scheduled by the doctor.
- *The treatment costs cover the total expenses paid from September 2024 to March 2025.*

**Treatment Costs** 108,608,942 vnd

**Phan Nhật Trường**  
Đắk Nông

- Retinoblastoma (left eye already removed).
- Nhật Trường received the first intra-arterial chemotherapy in August 2025 and is scheduled for the second session in October 2025 and the third session in November 2025.
- *The estimated treatment costs are for October 2025 and November 2025.*

**Treatment Costs** 140,000,000 vnd
